On February 26th, the Supreme Court will hear Oral Arguments in *Janus v. AFSCME*, a case funded by the wealthy elite 1% of Americans who want to make it harder for working people to join together and use our power in numbers. On this day, we will be hitting the streets to show that we will not be divided

by the corporate elites seeking to rig the economy further against working people.

The right to organize is one of the most basic rights of working people. Don't let them take that away from us. This country needs to hear our voices now more than ever.
