

STRIKING FOR MENTAL HEALTH CARE

Patients are waiting longer than ever for therapy appointments. Instead of sitting down with therapists to fix the broken system, Kaiser is ignoring us.

Understaffing puts patients at risk. Clinicians simply cannot provide clinically appropriate, evidence-based care to their patients with depression, anxiety disorders, PTSD, bipolar disorders, and other conditions. In fact, they can't even comply with the minimum standards in state law. That's why Kaiser continues to be under a state-ordered monitoring program following \$4 million in fines and repeated violations.

Kaiser's executives claim they're paying attention. They repeat talking points to the media and the public. But here's the reality: Kaiser's mental health clinics continue to be severely understaffed and patients are suffering.

That's not good care. It's illegal. It's immoral. It ruins lives.

MENTAL HEALTH STATEWIDE STRIKE
